Located within the Hotspot area of Pererenan and boasting a 100 meter absolute beach frontage with a neighbouring scenic river mouth this property has very high potential to expand and add to the unique property that is currently in place.

The villa was designed in the style of a traditional Balinese compound, the villa comprises a series of living and sleeping pavilions oriented for optimum privacy as well as for the glorious ocean views.

The liberal use of local materials – exotic hardwood and terrazzo floors, coral-limestone walls and vaulted along-along thatched roofs – along with a collection of museum-quality art and artefacts that contribute to the villa's unique character and charm.

The villa has magnificent tropical gardens with soft rolling lawns dotted with fragrant frangipanis and swaying coconut palms hug the landscape's natural contours, while an 18-metre infinity swimming pool blends seamlessly with the ocean panoramic views.

The property boasts a sprawling land area of 11.740m<sup>2</sup> made up with the main building, additional stylish Jogo building's, owners suite, bale's in various areas around the property and along with a common area shared tennis court.

The location is unbeatable and with the area of Pererenan becoming one of Bali's hotspot locations this investment opportunity should be worth some serious consideration.
